## Summary

Full Stack Web Developer with hands-on experience building responsive and scalable web applications using React, [Next.js](#), angular and ASP.NET Core. Skilled in both frontend and backend development with a focus on clean code, performance, and user-friendly solutions. Passionate about continuous learning and delivering high-quality, maintainable software.

## Professional Experience

### ASP.NET Full Stack

DataOcean

Saudi Arabia (Jeddah) 01/02/2025 – 08/06/2026

- Developed and customized enterprise ERP modules using ASP.NET Core and React, optimizing client workflows and improving core system efficiency.
- Created and maintained reports and invoices, including invoice migration.
- Collaborated directly with stakeholders and clients to translate business requirements into tailored technical solutions and intuitive user interfaces.
- Built scalable, maintainable, and decoupled features by implementing modern architectural patterns (such as Clean/Onion Architecture and the Specification Pattern).
- Streamlined application delivery by configuring CI/CD pipelines and managing automated deployments to cloud environments (e.g., Azure IIS via Docker), minimizing downtime.
- Used **ASP.NET Core** and **React** to build scalable and maintainable applications.

### Data Analysis Specialist

Al rifadah

Saudi Arabia (Makkah) 01/02/2026 – 30/06/2026

- Designed and developed interactive Power BI dashboards to monitor contracts, procurement operations, and supplier agreements
- Built dedicated tracking dashboards for vehicle contracts, enabling real-time visibility into contract status and renewals
- Created sales performance dashboards to support data-driven decision-making across business units .
- Utilized Excel for data cleaning, transformation, and preparation prior to visualization in Power BI
- Consolidated data from multiple sources into unified dashboards, improving reporting efficiency for key stakeholders

### Software Engineer (Internship)

KNX Association

Malaysia (Kuala Lumpur)

03/2022 – 08/2022

- Updated and improved the company website using **ASP.NET Core**.
- Implemented new features and resolved technical issues.
- Optimized site performance and supported content updates.
- Worked with the team to align updates with business goals.

## Skills

### • Front End Skills:

HTML | CSS | Bootstrap | Tailwind CSS | Hero UI | JavaScript | React.js | Toastify | Angular | RESTful APIs | Redux | Formik | state management | router

### • Backend Skills

C# | .NET Framework | ASP.NET Core | Web APIs (RESTful APIs) | Microsoft SQL Server | Object-Oriented Programming (OOP) | Entity Framework | LINQ | MVC | role base permissions | identity | Authentication & Authorization | API Security (OAuth, JWT)

### • Architecture & Design Patterns

Integration Architecture & Design | Unit of Work Pattern | Service Manager Pattern | Repository Pattern | Specification Pattern | Dependency Injection (DI) | Onion Architecture | N-Tier Architecture | SOLID Principles | Result Pattern | Caching | JWT & Refresh Tokens | Custom Middleware | Exception Handling | Debugging | Draw.io

### • DevOps, Tools & Infrastructure:

Git | GitHub | IIS | CI/CD & DevOps | Postman | Stimulsoft Design

## Projects

Gym Management System — Personal Project - [ [Github Link](#) ]

- Built a full-stack gym operations platform handling member registration, trainer scheduling, session booking, and membership plan management, structured in a three-layer architecture separating presentation, business logic, and data access.
- Designed a normalized relational schema of 8 entities using an abstract base class for shared member and trainer attributes and owned types for embedded addresses, enforcing integrity through EF Core Fluent API configurations and database-level check constraints.
- Implemented 20+ business rules including capacity-limited booking, duplicate-booking prevention, active-membership validation, and time-window restrictions governing cancellation and attendance marking.

# ABDULRAHMAN IBRAHEEM MOHAMMED SHAWEESH

 [LinkedIn](#) |  +9660549511210 |  [abdurahmanalshwish2022@gmail.com](mailto:abdurahmanalshwish2022@gmail.com) |  [GitHub](#)

- Applied Repository and Unit of Work patterns with Dependency Injection and AutoMapper, keeping domain entities isolated from the presentation layer through dedicated ViewModels.
- Integrated ASP.NET Core Identity for authentication and role-based authorization, with soft-delete behavior preserving historical booking and membership records.

Restaurant management system - [\[Github Link\]](#)

- Architected an end-to-end platform using Onion Architecture across Web API and React, leveraging Repository, Unit of Work, and Specification patterns.
- Implemented JWT authentication with refresh token rotation, role-based access control (RBAC), and automated email flows using MailKit.
- Engineered price snapshotting on order creation to preserve historical order integrity and configured soft deletes via global EF Core query filters.
- Developed an automated commission engine triggered on order delivery with settlement tracking and platform revenue reporting.
- Designed repository pattern with cached aggregates for high-performance read operations Full-Stack Restaurant Management & Online Ordering System
- Developed a full-stack restaurant platform using ASP.NET Core and React with clean architecture principles
- Implemented JWT authentication, role-based authorization, and secure payment processing with Stripe and PayPal
- Built customer ordering flow and admin dashboard for menu management, order lifecycle, and analytics
- Designed RESTful APIs with DTOs, service and repository layers to ensure scalability and maintainability

Notes App - Frontend Note Management System | React 19, TailwindCSS, React Hook Form, TanStack Query, HeroUI - [\[Github Link\]](#)

- Engineered a full-featured note-taking frontend with JWT authentication and complete CRUD operations
- Implemented complex form validation using React Hook Form, reducing data entry errors by 40%
- Built responsive UI with Tailwind CSS and HeroUI components for seamless multi-device experience
- Developed dark mode toggle, pagination system, and custom 404 page for enhanced user experience
- Integrated TanStack Query for efficient server state management with real-time updates and optimistic UI

## Courses & Certifications

---

- Front End Web Development ( Route Academy )
- [Asp.net](#) core Backend ( Route Academy )

## Languages

---

- Arabic – Native or Bilingual Proficiency.
- English – Full Professional Proficiency.
